

## SKALADDIN stageplan / technical rider

The stageplan and the technical rider of Skaladdin are to be understood as the best possible set-up. If the equipment of the organising party does not meet these standards, an adequate solution can be found with the technical responsible of the band.

Skaladdin does **not** have their own sound engineer.

If there are no specifications in the columns Mics/Remarks of the Channel List regarding the microphones, the choice lies in the responsibility of the employed technicians. In addition, the organizer is in charge of the choice of the console, the PA, as well as the lighting equipment.

Throughout Europe Skaladdin brings the whole Backline. Outside Europe the band has to pass on bringing the guitar and bass amplifier as well as the drum set (the cymbals are brought) due to financial and logistical reasons. Pimp Records is going to contact either the booking partner or the concert organizer about the supply of this equipment.

■ to be provided by the organizer, □ provided by Skaladdin

## SKALADDIN TECHNICAL RIDER

### CHANNEL LIST

Ch	Instrument	Mics/Remarks ■	Mics/Remarks □
